P-309

Surfaces washed, dried, and sanitized in an instant!

P-309 is a professional steam cleaning machine that, with its 3 available functions and 9-bar pressure, allows deep sanitization of all surfaces.

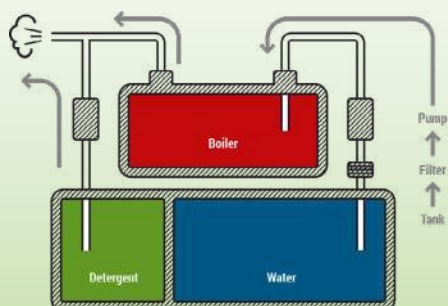

It is a special, powerful, and robust machine equipped with a high-pressure dry steam jet that can be used alone or together with detergent dispensing.

This enables the removal of the toughest dirt while minimizing the use of chemicals.

The included vacuum cleaner allows immediate drying of surfaces by collecting solids and liquids inside the large stainless-steel tank.

SYSTEM PLUS

P-309's dry steam combined with the **Power Jet** function cleans even the most challenging surfaces.

This feature enhances the effectiveness of steam and dirt removal. A special pressure pump injects water or detergent together with the steam. Non-foaming detergents specifically designed for high temperatures can be used.

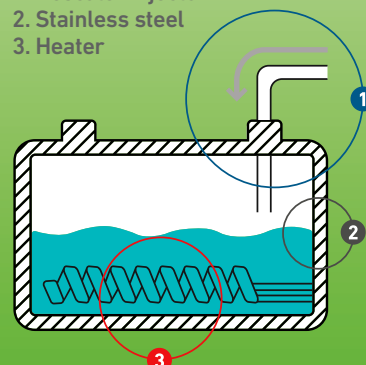

The automatic refill boiler.

P-309's 180°C steam ensures deep hygiene thanks to its high-performance boiler.

The boiler, a key component for steam production, is protected by Maxima's special technologies to prevent lime scale blockages, ensuring efficient operation over the years. In the P-309 model, it can be cleaned from above using a special accessory that uses the vacuum motor to remove water and lime scale.

STEAM GENERATION

1. Descaler injector
2. Stainless steel
3. Heater

Standard accessories

Steam lance adapter

Extensions

150-mm opening

Multifunction brush

Handle with hose

Wiper

Boiler cleaning tool

Optional accessories

Kit sanitation maxi

Vaporizing turbo brush

Window cleaner with bristles 360°

Transparent nozzle

Extendable hose from 1 to 6 m

Turbovapor

High efficiency turbo brush

Acqua Clean

Degreaser

TECHNICAL DATA

Dimensions: **45x40x83 cm (Height)**

Empty weight without accessories: **20 Kg**

Electrical consumption: **3000 W**
(available on request 2300 W)

Suction power: **2400 MM**

Motor power: **1200 W**

Boiler power: **3000 W**

Steam pressure: **900 kPa**

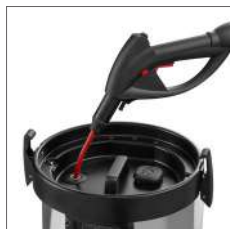

Steam ready time: **6/7 minuti**

Boiler capacity: **2,4 L**

Water tank for steam: **3 L**

Detergent tank: **2 L**

Collection tank: **8 L**

A simple gesture
to remove limescale.
